AI ADOPTION · DATA SHEET

AI Adoption Services

AI solutions for your business problems, built securely.

The right AI starts with the right problem. We find where AI helps most and build what fits your systems and data. AI agents handle routine tasks with your team in the loop, so people focus on higher-value work. Each solution launches with security in place and stays governed.

WHY ADOPT AI SECURELY NOW

Early movers pull ahead.

AI use is spreading fast, and AI leaders report faster growth. Weak security can cost that lead.

Your people already use AI.

Many bring their own AI tools, and data can slip past your security.

Tools alone are not a plan.

Only 1 in 4 U.S. employees say their employer has shared a clear AI plan. Security starts with a plan.

All AI Adoption services

STEP	SERVICE	WHAT IT IS
Assess	**AI Readiness Assessment**	Find where AI fits, check data and governance against ISO/IEC 42001 and the NIST AI RMF, then develop a strategy and roadmap.
Build	**AI Agent and Automation Builds**	Custom agents and automations for your business workflows, built on the AI platform that fits. Your people stay in control, and our security practitioners test each one against the OWASP Top 10 for Agentic Applications before it goes live.
Roll out	**Governed AI Rollout**	Your enterprise AI assistant, set up with single sign-on, audit logs, data retention, approved connectors, a use policy, and a risk register.
	AI Security Training	Customized security, privacy, and bias awareness training for your teams.
Sustain	**AI Governance Retainer**	Monthly tool reviews, risk register upkeep, and audit support.

WHY INTERSEC

Answers for security reviews. Customers now ask how you govern AI. Your audit logs and risk register help you answer.

Our security practitioners test AI. They check every agent and automation we build against the OWASP Top 10 lists for agentic and LLM applications.

One partner, start to finish. We enable secure AI in your organization and keep it governed after launch.

ABOUT INTERSEC

InterSec is a cyber defense services provider serving small and mid-size businesses, federal and state agencies, and commercial companies.

Our work includes cyber program development, security compliance, cyber defense, and offensive security testing for web, mobile, cloud, and enterprise applications and AI.

We are active members of AI centers of excellence and working groups, including groups at NIST and CISA.
